Bentley Flying Spur

Description

Today's Continental Flying Spur is sheer excellence, combining Supercar performance with four-door practicality in a model that manages to be both exciting to drive and a cossetting place to relax.

Every Bentley designed has that intoxicating blend of power and refinement and the Continental Flying Spur is no different. Our Bentley Flying Spur is in Silver.

Interior

Throughout the cabin, premium black leather hides, black carpets and the finest wood veneers combine on every surface to give a welcoming and contemporary environment for our passengers. The classic Bentley design touches include unique speed tread plates, drilled sports pedals and a 3-spoke leather sports wheel.

Exterior

With a prominent bonnet and sporting lines that flow from the front arches and speed towards the back of the car, the Continental Flying Spur's design pays homage to some of the great Bentleys of yesteryear; cars that even when standing still gave the appearance of roaring away into the distance.

Engine

Beneath its bonnet sits one of the world's most advanced - and unique - 12-cylinder engines; a 552bhp (560 PS) 6 litre, twin turbocharged powertrain that can propel the car from standstill to 60mph in less than 5 seconds.
